 - **5 years:** Docker, Bash Scripting
 - **4 years:** Tailwind, Alpine.js, Livewire
 - **Other:** Java, Clojure, Rust, React, React Native, C#
-

Personal Statement

Independent Full Stack Developer specializing in high-impact, contract-based projects. Since 2017, I have delivered scalable software solutions across multiple industries, rapidly integrating payment gateways and processing **over \$3M** in transactions. With expertise in Laravel and its ecosystem, I thrive in fast-paced remote environments, applying **TDD**, **BDD**, and **clean code** to ensure maintainable, high-performance applications. Experienced in working **across time zones**, collaborating asynchronously, and integrating seamlessly into existing teams.

Work Experience

Full Stack Engineer - s90 Technologies

San Francisco, CA (Remote)

May 2022 - Present

- Developed and maintained TALL stack applications.
- Created and maintained features for energy suppliers, water treatment, tool calibration, and insurance companies.
